Code Provision: 2011 NEC 210.52(D) Bathrooms. In dwelling units, at least one receptacle outlet shall be installed in bathrooms within 3ft of the outside edge of each basin. The receptacle outlet shall be located on a wall or partition that is adjacent to the basin or basin countertop, located on the countertop, or installed on the side or face of the basin cabinet not more than 12in below the countertop. Receptacle outlet assemblies listed for the application shall be permitted to be installed in the countertop.

Variance Requested: Applicant is appealing receptacle requirement due to unique bathroom layout.

Discussion: This is a 34 story high rise residential tower.

Variance approved for outlets installed within 3 feet 10 inches of the outside edge of the basin. The appellant is to provide the office with a list of the units affected by this variance, and have a copy on site for the inspection.

After the motion was carried the Appellant then stated that he was requesting to discuss a variance request that was not filed with the above and did not appear on the agenda. The Board, without objection, agreed to hear his request. By doing so the Codes Staff will amend the original Appeal to reflect the entire variance.
